# ABOUT THE MOBILITY

The VOC, Voices Of Change, is a CERV project that seeks to address the disengagement of young people from established forms of democratic participation, particularly among girls with a migratory background. The project aims to foster their active citizenship, enhance their inclusion, and strengthen their contribution to the advancement of democracy.

In Brussels, our team members and partners will meet with EU authorities for presenting and discussing the recommendation policy paper on the inclusion of young migrant and refugee girls in the decision-making process. The event is crucial, as young migrants and refugees will have the opportunity to raise their voices and exchange opinions directly with decision makers.
